

The

Farmer's Predicament

QCA Scheme of Work: Maths (primary and secondary) & Science (secondary)

AN EXERCISE IN MATHEMATICAL LOGIC

- Made By teachers
for teachers
- Engaging animations
- Printable worksheets
- Interactive whiteboard ready

The Farmer's Predicament asks the player to help the farmer with his problem. He needs to move his dog, chicken and a sack of grain over the river in the rowboat. Prepared specifically for use on interactive whiteboards as well as by single users, The Farmer's Predicament allows the player to explore the logic of the problem and not get bogged down in remembering the moves as happens when this exercise is tried on paper. Its lots of fun as well!
